MARCELA CAMPASSI

Starkville, MS | 256.627.2352 | marcycampassi@gmail.com | marcelacampassi.com | LinkedIn: Marcela Campassi

EDUCATION

Mississippi State University, Starkville, MS **Expected May 2027**
Bachelor of Science in Electrical Engineering | Minor in Mathematics
Cumulative GPA: 3.86/4.00

EXPERIENCE

Electrical and Computer Engineering (ECE) Foundations Lab Mentor **August 2026 - Present**
ECE Dept., Mississippi State University, Starkville, MS
- Guide electrical and computer engineering students through hands-on lab modules covering core circuit analysis along with basic electronic instrumentation.
- Test student conceptual understanding during task evaluations through interactive questioning to verify working knowledge and assign lab grades.

Undergraduate Research Assistant **January 2026 - Present**
Center for Advanced Vehicle Systems (CAVS), Mississippi State University, Starkville, MS
- Built a FreeRTOS micro-ROS sensor node on a Renesas RA6M5 that streams three I2C sensors as seven ROS 2 topics for the Additive Manufacturing Lab.
- Documented the full hardware and software build and packaged the host agent in a Podman container.

Supplemental Instruction Leader/Mentor **August 2025 - Present**
Center for Academic Excellence (CAE), Mississippi State University, Starkville, MS
- Develop and lead biweekly review sessions that reinforce lecture material and prepare students for Microprocessors exams.
- Coordinate with faculty and facilitate collaborative problem solving to improve student engagement and understanding.
- Observe 4 leaders weekly across different disciplines.

Maintenance Technician **July 2021 - Present**
Quality Inn, Hamilton, AL
- Assist with electrical wiring, plumbing, and general facility maintenance.
- Troubleshoot and repair equipment and facility issues to restore service quickly and safely.

Instrumentation and Controls Design Intern **May 2026 - August 2026**
Entergy Nuclear Headquarters, Jackson, MS
- Supported nuclear plants' refueling cycle extension projects by performing drift analysis and setpoint data validation across engineering calculations.
- Completed Phase 1 for 38 calculations.

Undergraduate Researcher **May 2025 - August 2025**
Georgia Institute of Technology, Atlanta, GA
- Conducted cleanroom research on the fabrication of 4H-SiC MEMS gyroscopes.
- Operated 36 cleanroom tools across lithography, deposition, etching, and related fabrication processes.

TECHNICAL SKILLS

Programming: Python, MATLAB, C++, C, PIC24 Assembly, Verilog, KUKA
Software: E2 Studios, Tera Term, Visual Studio, MATLAB, Multisim, Quartus, MPLAB, AutoCAD, Microsoft Word, Excel, PowerPoint, Publisher, Wolfram, KUKA System Software
Embedded/Robotics: ROS 2 (Humble), microROS, FreeRTOS, I2C, USB-CDC, Podman
Lab/Hardware: Cleanroom fabrication, sensor integration, soldering, troubleshooting, electrical wiring
Soft Skills: Leadership, technical communication, collaboration, problem solving, mentoring, public speaking

LEADERSHIP AND INVOLVEMENT

- Bagley College of Engineering Ambassador for the ECE Dept.
- ECE Foundations Lab Mentor
- Shackouls Honors College
- Society of Women Engineers
- Supplemental Instruction
- Tau Beta Pi Engineering Honor Society
- Thrive in Five
